

Electrical Consent Form

The Saskatchewan Research Council (SRC) mandate is to encourage action by the public and industry by facilitating the development and implementation of cost-effective energy conservation initiatives and programs. The Solar Heating Initiative for Today (SHIFT) is one such program. This program compliments the federal ecoENERGY for Renewable Heat program administered by Natural Resources Canada (“NRCan”) for the installation of solar heating systems.

The financial assistance provided under SHIFT is available to those Saskatchewan municipalities or commercial enterprises that sign this consent form. Consent allows SRC to access energy consumption records from SaskEnergy, SaskPower or the local energy provider for up to eighteen (18) months prior to the date on this form and for up to 10 years after the installation is complete. The purpose of gathering this information is to assess the energy, economic, and environmental impact of the initiative. Data will be kept confidential and only reported publicly in aggregate form. The below authorization form is required to be completed and submitted to NRCan as part of the ecoENERGY for Renewable Heat program application.

No further release or disclosure of the results will be made except in accordance with the provisions of *The Freedom of Information and Protection of Privacy Act* (Saskatchewan). NRCan will share information submitted by applicants with Saskatchewan Research Council for the purpose of issuing cheques and for conducting non-commercial analysis of energy, economic and environmental impacts related to the SHIFT program.

Date _____ Name of Organization _____

In the table below please list the building names and the **Electrical** Account Numbers (shown on billing statements) and the meter numbers (contact SKPower) for each of the buildings that you are providing authorization for:

Billing Name	Customer Reference	Account Number	Meter Number

The undersigned hereby authorizes the provincial and local energy utilities to release power consumption information in the form of billing statements to SRC, for the facilities listed above for up to eighteen(18) months prior to the date listed and for up to 10 years after the installation is complete.

Name of Authorized Person (please print) _____

Position of Authorized Person _____

Signature _____
